5+ YEARS

Software engineering experience

PRAN-RFL GROUP

Current enterprise technology role

EXPRESS ERP

Published production mobile app

PROFESSIONAL PROFILE

AI-focused Software Engineer with 5+ years of experience building enterprise mobile applications, Oracle EBS-integrated ERP solutions, APIs, computer-vision features, and conversational systems. Currently working at PRAN-RFL Group on Oracle EBS and mobile application development, including the published production app Express ERP. Hands-on expertise in Flutter, Dart, Oracle ORDS, PL/SQL, Python, TensorFlow/TFLite, OpenCV, scikit-learn, Flask/FastAPI, Firebase, WebSocket, and Docker. Skilled at translating complex operational requirements into reliable, production-ready software.

CORE TECHNICAL SKILLS

AI / MACHINE LEARNING Python, TensorFlow, TensorFlow Lite, OpenCV, scikit-learn, AI agents, demand forecasting, time-series analysis, computer vision, image classification, object detection, model evaluation, on-device inference	CONVERSATIONAL AI Chatbot development, Telegram/Messenger/WhatsApp bots, LLM application integration, Ollama, prompt-driven workflows, Python automation
ORACLE / BACKEND Oracle EBS, Oracle ORDS, PL/SQL, FastAPI, Flask, REST APIs, Firebase, MongoDB, WebSocket, JSON, Docker	MOBILE / ENTERPRISE APPS Flutter, Dart, Android, Kotlin, Java, BLoC/Cubit, GetX, ERP workflows, Google Maps, QR/Rfid/NFC, PDF and label printing
IOT / ENGINEERING ESP32, AWS IoT, device integration, automation workflows, production support	TOOLS / COLLABORATION Git, GitHub, Postman, Linux, Agile collaboration, requirements analysis, debugging, deployment support

PROFESSIONAL EXPERIENCE

Software Engineer - Oracle EBS & Mobile Applications | PRAN-RFL Group

Present

Dhaka, Bangladesh

- Develop and maintain Oracle EBS-connected mobile applications supporting manufacturing, inventory, OPM, quality control, market survey, sample collection, and operational workflows.
- Build Flutter ERP modules with BLoC/Cubit and integrate Oracle ORDS REST APIs, PL/SQL services, QR/barcode scanning, image upload, role-based access, and PDF/label printing.
- Troubleshoot production issues across Flutter, API, and Oracle layers while collaborating with business users and technical teams.
- Published and support Express ERP, a production mobile application used for enterprise operations at PRAN-RFL Group.

Executive Officer (Flutter Developer) | TISS Limited

May 2025 - Dec 2025

Dhaka, Bangladesh

- Developed Flutter-based enterprise and mobile applications with REST APIs, Firebase services, real-time communication, and role-based workflows.
- Supported requirement analysis, debugging, production issue resolution, and reliable release delivery.

Mobile Application Developer | BD Calling IT Limited

Aug 2024 - Apr 2025

Dhaka, Bangladesh

- Developed cross-platform Flutter applications with REST APIs, Firebase, maps, authentication, and responsive interfaces.
- Implemented real-time and data-driven features using WebSocket, MongoDB-backed services, and reusable architecture.
- Improved application stability through debugging, performance tuning, code review, and release support.

Executive - Mobile Application Development | Pakiza Software Limited

Jan 2023 - Aug 2024

Dhaka, Bangladesh

- Delivered Flutter-based ERP and business applications with API-driven forms, approval workflows, reports, and operational dashboards.
- Converted business requirements into maintainable mobile modules and backend integrations.
- Supported implementation, user feedback, issue resolution, and iterative product improvement.

Junior Software Engineer | BizzNTek Limited

Mar 2021 - Nov 2022

Dhaka, Bangladesh

- Built and maintained Flutter and Android applications, integrated backend APIs, and resolved functional and UI defects.
- Contributed to feature development, testing, release preparation, and technical documentation.

SELECTED AI & ENTERPRISE PROJECTS

Express ERP (Published Production App) — Flutter, Oracle EBS, Oracle ORDS, PL/SQL

- Developed and support enterprise mobile workflows integrated with Oracle EBS, covering operational data entry, approvals, inventory, manufacturing, QR processes, image handling, and production reporting.

Flutter TFLite Image Classification Engine (Published Package) — Flutter, Dart, TensorFlow Lite

- Created a reusable inference engine supporting file, path, bytes, and live camera-frame inputs with configurable preprocessing, confidence thresholds, top-K output, normalization, frame skipping, and real-time stream controls.

Human Flow Detection — Python, OpenCV, Computer Vision

- Developed a vision-based system to detect and analyze human movement from image and video streams for monitoring and automation use cases.

Heart Disease Detection AI — Python, scikit-learn, Machine Learning

- Built a supervised classification workflow covering data preprocessing, model training, evaluation, and prediction for heart-disease risk detection.

Interview Agent — Python, LLM, AI Agent, NLP

- Built an AI-assisted interview workflow for role-specific question generation, structured mock interviews, candidate-response analysis, and actionable feedback.

Product Demand Forecasting — Python, Machine Learning, Time-Series Forecasting

- Developed a forecasting solution to estimate future product demand from historical sales patterns, supporting inventory planning, replenishment decisions, and stock optimization.

Conversational AI & Automation Bots — Python, Flask, Telegram, Messenger, WhatsApp, Ollama

- Developed chatbot and automation integrations, including Telegram bot @Accountant2975_bot, platform messaging workflows, API services, and local LLM chat integration.

AI PDF Reader (Published Package) — Flutter, PDF Processing, Text-to-Speech

- Built a Flutter package for PDF text extraction, TTS playback, sentence highlighting, language support, and reading-position persistence.

PRODUCTS, OPEN SOURCE & RESEARCH

- Products: Express ERP (PRAN-RFL Group), Cripton ERP, Enorsia E-commerce, My Road, Payments All, and enterprise applications for manufacturing and operational workflows.
- Published Flutter packages: flutter_tflite_image_classification_engine, ai_pdf_reader, linear_calender, overlapped_image_list, absolute_sizer, and custom UI utilities.
- Research interests and works: Traffic Flow Forecasting in Intelligent Transportation Systems and Bucket Filling Algorithm.

EDUCATION & PROFESSIONAL DEVELOPMENT

B.Sc. in Computer Science and Engineering

Jan 2018 - Feb 2022

Daffodil International University, Dhaka

- AI Engineering Bootcamp for Programmers - Ostad

SELECTED ACHIEVEMENTS

7TH PLACE Android Hackathon	64TH PLACE CPC Takeoff Contest	203RD ICPC 2020 Local Ranking
