

NAFIM AHMED

SOFTWARE ENGINEER | MOBILE APPLICATIONS | FULL-STACK APIs | ENTERPRISE SYSTEMS

Dhaka, Bangladesh | Phone & WhatsApp: +8801797609439 | recentnafimahmed@gmail.com

GitHub: github.com/NafimAhmed | Portfolio: nafimahmed.github.io | LinkedIn: linkedin.com/in/nafim-ahmed-recent

5+ YEARS

Software engineering experience

FULL SDLC

Requirements to production support

EXPRESS ERP

Published enterprise mobile app

PROFESSIONAL PROFILE

Mobile-focused Software Engineer with 5+ years of experience building and maintaining user-facing mobile applications, enterprise ERP solutions, server-integrated workflows, and reusable developer tools. Currently develops Oracle EBS-connected mobile systems at PRAN-RFL Group and supports the published Express ERP application. Experienced across the full software development lifecycle - requirements analysis, technical design, implementation, API integration, testing, release, production support, and continuous improvement. Strong in Flutter, Dart, Android, Kotlin, Java, Oracle ORDS, PL/SQL, Python, FastAPI, Firebase, WebSocket, MongoDB, Docker, TensorFlow Lite, and OpenCV. Brings product ownership, practical system thinking, and cross-functional collaboration to complex and ambiguous engineering problems.

CORE TECHNICAL SKILLS

MOBILE ENGINEERING

Flutter, Dart, Android, Kotlin, Java, BLoC/Cubit, GetX, responsive UI, Google Maps, QR/barcode, RFID, NFC, PDF and label printing

BACKEND & API INTEGRATION

Oracle ORDS, REST API design and integration, PL/SQL, Oracle EBS, FastAPI, Flask, Firebase, MongoDB, WebSocket, JSON

ARCHITECTURE & QUALITY

Modular architecture, reusable components, API contracts, role-based access, offline-capable workflows, debugging, performance tuning, API testing, release support

AI & COMPUTER VISION

Python, TensorFlow, TensorFlow Lite, OpenCV, scikit-learn, image classification, object detection, preprocessing, on-device inference

TOOLS & DELIVERY

Git, GitHub, Postman, Apidog, Swagger, Linux, Docker, Android Studio, Visual Studio Code, deployment and production support

PRODUCT & COLLABORATION

Requirements analysis, technical design, cross-functional delivery, user feedback, documentation, Agile collaboration, ambiguity resolution

PROFESSIONAL EXPERIENCE

Software Engineer - Oracle EBS & Mobile Applications | PRAN-RFL Group

2026 - Present

Dhaka, Bangladesh

- Own implementation and production support for Oracle EBS-connected mobile features used in manufacturing, inventory, OPM, quality control, market survey, sample collection, display-room, and administrative workflows.
- Build Flutter modules with BLoC/Cubit and integrate Oracle ORDS and PL/SQL services, including validation, pagination, search, role-based access, QR/barcode scanning, image handling, and PDF or label printing.
- Work across requirements, technical design, development, API testing, release, troubleshooting, and iterative improvement while collaborating with business users, Oracle developers, database teams, and mobile engineers.
- Diagnose production issues across Flutter, Android, API, and Oracle layers and deliver maintainable fixes without disrupting operational workflows.
- Develop and support Express ERP, a published production mobile application for enterprise operations at PRAN-RFL Group.

Executive Officer (Flutter Developer) | TISS Limited

May 2025 - Dec 2025

Dhaka, Bangladesh

- Developed Flutter-based enterprise and mobile applications with REST APIs, Firebase services, real-time communication, and role-based workflows.
- Converted product and business requirements into reusable components, reliable integrations, and maintainable user-facing features.
- Supported debugging, production issue resolution, release delivery, and communication with technical and non-technical stakeholders.

Mobile Application Developer | BD Calling IT Limited

Aug 2024 - Apr 2025

Dhaka, Bangladesh

- Developed cross-platform Flutter applications with REST APIs, Firebase, maps, authentication, responsive interfaces, and data-driven workflows.
- Implemented real-time features using WebSocket and MongoDB-backed services and improved stability through debugging, performance tuning, code review, and release support.

Executive - Mobile Application Development | Pakiza Software Limited

Jan 2023 - Aug 2024

Dhaka, Bangladesh

- Delivered Flutter-based ERP and business applications with API-driven forms, approval workflows, reports, operational dashboards, and backend integrations.
- Translated business requirements into maintainable mobile modules and supported implementation, user feedback, issue resolution, and continuous product improvement.

PROFESSIONAL EXPERIENCE - CONTINUED

Junior Software Engineer | BizzNTek Limited

Mar 2021 - Nov 2022

Dhaka, Bangladesh

- Built and maintained Flutter and Android applications, integrated backend APIs, and resolved functional, UI, and integration defects.
- Contributed to feature development, functional testing, release preparation, production fixes, and technical documentation.

SELECTED MOBILE, FULL-STACK & AI PROJECTS

Express ERP - Published Production Application - Flutter, Oracle EBS, Oracle ORDS, PL/SQL

- Develop and support enterprise mobile workflows for operational data entry, approvals, inventory, manufacturing, quality processes, QR operations, image handling, and production reporting.
- Integrate complex Oracle-backed services into clear mobile experiences with structured validation, error handling, role-based access, and production support.

Flutter TFLite Image Classification Engine - Published Package - Flutter, Dart, TensorFlow Lite

- Created a reusable inference engine for file, path, byte, and live camera-frame inputs with configurable preprocessing, confidence thresholds, top-K output, normalization, frame skipping, and real-time stream control.

AI PDF Reader - Published Package - Flutter, PDF Processing, Text-to-Speech

- Built a Flutter package for PDF text extraction, text-to-speech playback, sentence highlighting, language support, and reading-position persistence.

Real-Time Messaging & Automation Systems - Python, FastAPI/Flask, Socket.IO, Telegram, Ollama

- Developed API and real-time messaging prototypes, chatbot integrations, platform automation workflows, Swagger-documented services, and local LLM chat integration.

Server-Driven 3D Commerce Prototype - Flutter, REST APIs, GLB Models

- Built a mobile proof of concept that retrieves product data and 3D GLB models from server-side APIs, allowing new product collections to be added without bundling models inside the application.

PRODUCTS, OPEN SOURCE & TECHNICAL CONTRIBUTIONS

PRODUCT PORTFOLIO Express ERP, Cipton ERP, Enorsia E-commerce, My Road, Payments All, and enterprise applications for manufacturing and operational workflows.	PUBLISHED FLUTTER PACKAGES flutter_tflite_image_classification_engine, ai_pdf_reader, linear_calender, overlapped_image_list, absolute_sizer, and reusable UI utilities.
COMPUTER VISION & ML Human Flow Detection; Heart Disease Detection AI; image classification and on-device inference experiments using OpenCV, scikit-learn, and TensorFlow Lite.	RESEARCH INTERESTS Traffic Flow Forecasting in Intelligent Transportation Systems and Bucket Filling Algorithm.

ENGINEERING OWNERSHIP & PRODUCT DELIVERY

- Deliver features across requirements analysis, technical design, mobile implementation, server-side API integration, testing, release, and production maintenance.
- Coordinate with business users, backend and Oracle developers, database teams, and other engineers to turn ambiguous operational needs into reliable user-facing workflows.
- Build reusable packages, components, and integration patterns that improve consistency across mobile projects and reduce repeated engineering work.
- Maintain access-controlled, API-driven features involving QR and barcode processes, real-time communication, image workflows, and device capabilities.

EDUCATION & PROFESSIONAL DEVELOPMENT

B.Sc. in Computer Science and Engineering

Jan 2018 - Feb 2022

Daffodil International University, Dhaka

- AI Engineering Bootcamp for Programmers - Ostad

SELECTED ACHIEVEMENTS

7TH PLACE Android Hackathon	64TH PLACE CPC Takeoff Contest	203RD ICPC 2020 Local Ranking
