Skills

Flutter.
Android Native.

Senior Flutter / Mobile Application Engineer with 5+ years of experience building production-grade mobile and enterprise applications. Experienced in Flutter, Dart, Clean Architecture, REST API integration, Firebase, Oracle ERP/ORDS, CI/CD and native Android integration. Published multiple production applications and Flutter packages, with additional experience in AI/LLM integration and IoT solutions.

Work history

2025-05 -
Current

Assistant Manager — Software Engineering / Mobile

PRAN-RFL Group, Dhaka, Dhaka

- Develop, implement, and support enterprise-grade mobile applications for business operations.
- Build scalable Flutter applications and integrate them with REST APIs and Oracle ORDS-based backend services.
- Work with Oracle ERP-related systems, PL/SQL, and API-driven workflows to support enterprise processes.
- Implement application features such as QR scanning, PDF generation, API integration, and business data processing.
- Collaborate with management and cross-functional teams to understand business requirements and translate them into practical software solutions.
- Provide application support, troubleshoot production issues, and contribute to continuous system improvements.
- Contribute to technical and strategic planning for improving business applications and operational efficiency.

2024-08 -
2025-04

Mobile Application Developer

BD Calling IT Limited, Dhaka

- Developed and maintained cross-platform mobile applications using Flutter and Dart.
- Built responsive and user-friendly application interfaces with a strong focus on usability and functionality.

Java,C, C++, Dart.

Python, Flask.

AI Engineering

Achievements

- CPC Takeoff Contest Mar 2018 64th position, coding and problem-solving contest
- Android Hackathon Jul 2019 7th position, mobile app development
- ICPC 2020 Mar 2020 203rd local ranking in a global programming contest

Full Professional

Specializations

Mobile Development

Flutter, Dart, Android Native, Java/Kotlin

- Integrated REST APIs and backend services to deliver dynamic mobile application features.
- Worked on application debugging, optimization, maintenance, and feature enhancement.
- Collaborated with team members to convert business requirements into functional mobile solutions.
- Improved application reliability and user experience through continuous testing and refinement.

2023-01 -
2024-08

Executive – Mobile Application Development

Pakiza Software Limited, Dhaka

- Developed ERP-focused mobile applications using Flutter and Dart.
- Implemented mobile workflows to support enterprise and business operations.
- Integrated applications with backend APIs for retrieving, processing, and submitting enterprise data.
- Developed reusable UI components and application features to improve maintainability and development efficiency.
- Performed debugging, maintenance, and enhancement of existing mobile applications.
- Worked closely with backend and business teams to deliver mobile solutions aligned with operational requirements.

2021-03 -
2022-11

Junior Software Engineer

BizzNTek Limited, Dhaka

- Developed mobile applications and software solutions with a focus on mobile and IoT technologies.
- Assisted in designing and implementing application features based on project requirements.
- Worked with mobile application development, API integration, and IoT-related software solutions.
- Participated in debugging, testing, maintenance, and continuous improvement of software applications.

Architecture & State
Management

Clean Architecture, SOLID,
BLoC/Cubit, Riverpod/GetX

Backend & API

REST API, Flask, FastAPI,
Oracle ORDS, PL/SQL

Database & Storage

Oracle, Firebase/Firestore,
Hive, SQLite

DevOps & Tools

Git, GitHub, Docker, GitHub
Actions, CI/CD

AI / ML

LLM Integration, RAG,
Embeddings, Vector Search,
Function Calling, OpenCV,
MediaPipe, YOLO, TFLite

- Collaborated with development teams throughout the software development lifecycle.
- Strengthened practical experience in object-oriented programming, mobile development, and software engineering practices.

Education

2022-02	Bachelor of Science: Computer Science and Engineering <i>Daffodil International University - Dhaka</i> B.Sc. in Computer Science & Engineering Daffodil International University CGPA: 3.91/4.00 2022
2016-01	HSC: Science <i>Milestone College - Dhaka</i>
2014-01	SSC: Science <i>Milestone College - Dhaka</i>

Open Source Contributions

Published reusable Flutter packages on pub.dev covering AI and computer vision, offline data synchronization, PDF processing, Firebase notifications, augmented reality, responsive UI, and reusable developer utilities.

- **ai_pdf_reader** - Flutter PDF reader with text extraction, text-to-speech, offline summarization, highlighting, and reading progress support. (https://pub.dev/packages/ai_pdf_reader)
- **easy_rest_sync** - Offline-first REST API synchronization package with local persistence, data streaming, and conflict-ready workflows. (https://pub.dev/packages/easy_rest_sync)
- **flutter_tflite_image_classification_engine** - Lightweight TensorFlow Lite engine for on-device image classification using custom models, images, and real-time frame streams. (https://pub.dev/packages/flutter_tflite_image_classification_engine)
- **mediapipeline_flutter** - MediaPipe-powered computer vision package supporting native

hand landmark detection and gesture recognition workflows.

(https://pub.dev/packages/mediapipeline_flutter)

- **firebase_notification_helper** - Helper package for Firebase Cloud Messaging, local notifications, device tokens, topics, and push notification workflows.

(https://pub.dev/packages/firebase_notification_helper)

- **linear_calender** - Lightweight and customizable horizontal calendar and date picker for Flutter applications.

(https://pub.dev/packages/linear_calender)

- **ar_tryon_view** - Augmented reality try-on component for camera-based glasses, face masks, and transparent image overlays.

(https://pub.dev/packages/ar_tryon_view)

- **absolute_sizer** - Responsive sizing utility for building consistent Flutter interfaces across different screen sizes.

(https://pub.dev/packages/absolute_sizer)

Notable Projects

AI Interview Agent for Google Meet

Python, Playwright, Ollama, Faster Whisper, LLM, Speech-to-Text, Text-to-Speech

Project Link:

<https://github.com/NafimAhmed/google-meet-interview-agent>

- Developed an AI powered interview agent that automatically joins Google Meet sessions and conducts technical interviews through real time voice interaction.
- Integrated Faster Whisper for speech recognition and Ollama based local LLMs for intelligent question generation, contextual follow up questions, and candidate response evaluation.
- Automated Google Meet interaction using Playwright and Chrome, enabling the agent to participate in interviews without requiring a separate user interface.

- Built an end to end interview workflow including voice based questioning, response transcription, answer scoring, automated feedback, interview history, and structured final reports.
- Designed the system with modular components for meeting automation, speech processing, AI orchestration, candidate evaluation, and report generation, making the project easier to maintain and extend.

Express ERP - PRAN-RFL Group

Enterprise ERP Mobile Application, Flutter, Dart, Oracle ORDS, REST API

Google Play:

(https://play.google.com/store/apps/details?id=com.pranrfl.express_erp)

- Developed an enterprise mobile application for PRAN-RFL Group to support ERP-based business operations.
- Worked on mobile application development, implementation, API integration, and production support.
- Integrated mobile workflows with Oracle-based enterprise backend systems through REST and ORDS APIs.
- Implemented functionality involving QR-based operations, enterprise data processing, PDF generation, and business workflow automation.
- Contributed to improving accessibility of ERP operations through mobile-first solutions.
- Successfully published on the Google Play Store.

Cripton ERP

Enterprise Resource Planning Mobile Application

Apple App Store:

(<https://apps.apple.com/us/app/crypton-erp/id6478108512>)

- Developed as a service-based ERP mobile application focused on supporting enterprise business operations.
- Built with a mobile-first approach to provide convenient access to ERP-related workflows and business services.
- Contributed to application development, feature implementation, API-driven functionality, and

overall mobile user experience.

- Successfully published on the Apple App Store.

Enorsia

EU-Based E-Commerce Mobile Application

Apple App Store:

(<https://apps.apple.com/ae/app/enorsia/id6470290654>)

- Contributed to the development of a mobile e-commerce application designed for the European market.
- Worked on customer-facing mobile functionality with a focus on usability, application performance, and user experience.
- Implemented application features and integrated backend-driven functionality.
- Successfully published on the Apple App Store.

Accountant Telegram Chatbot

Python, Telegram Bot, Automation

GitHub:

(<https://github.com/NafimAhmed/telegram-bot-in-python>)

- Developed a Python-based Telegram chatbot to automate conversational interactions and user requests.
- Implemented command processing and backend logic for generating automated responses.
- Designed the bot architecture to support extensible functionality and integration with additional services.
- Published the complete project source code on GitHub
